Energy Audit Training

Our Energy Auditor Building Performance Institute, Inc. (BPI) Training & Certification Package will help you understand the relationship between all the systems in the house and its effect on occupant health, safety and comfort, energy efficiency and durability. This training will teach you how various systems interact, and how a flaw in one area can compromise the performance in another system. You will learn the fundamentals of home performance evaluation, home performance assessments and more. This course is designed for the serious professional who wants training from a qualified expert instructor. Intended for the individual or a professional with a trades background, this course will thoroughly train you from start to finish on how to perform a high-quality energy audit, and even prepare you for the BPI certification exam. Course fee is $695.

This online course:
• is self-paced
• takes about 30 – 45 days to complete (no time limit for completion)

Course includes:
• Residential Energy Training Book
  This book introduces energy-related components and explains all the important possibilities for energy conservation. You will learn that effective energy conservation requires a whole-house approach that addresses the biggest energy wasters first.
• 90-Minute Field Training DVD
  This video takes you through an existing home energy audit from start to finish.
• 20 Hours of Instructor Led Online Training
  You will learn about energy auditing, energy basics, building assessment, air leakage, HVAC systems, domestic hot water (DHW), lighting & appliances, health & safety, BPI field examinations, duct blaster training and RESNET (Residential Energy Services Network).
• And More
  Including AHIT data collection form, exam simulator, and 36 essential documents such as field testing guides, equipment manuals, and information regarding BPI and RESNET.
