Over the course of four decades, Dakota County Technical College has marshaled a culture of success founded on innovation and determination. Our faculty, staff, students and alumni have networked and connected with individuals, families, companies, businesses, communities, organizations and institutions throughout our region and beyond. Those connections have evolved into longstanding relationships, collaborations and partnerships that define the driving force of our mission: Education for Employment.

Our Continuing Education & Customized Training division works effectively with business and industry leaders to develop training programs matched precisely to marketplace needs. In fact, nine CT programs grew roots and expanded to become credit-based academic majors, including Railroad Conductor Technology and Biomedical Equipment Technology to name but two. By brainstorming up-to-the-minute training solutions for business and industry, Continuing Education & Customized Training also creates pathways for traditional and nontraditional students pursuing degrees, diplomas and certificates.

DCTC also enhances the bottom line of area businesses, companies and corporations through Minnesota Job Skills Partnership grants that provide training opportunities for current and new employees. This progress-oriented training opens doors to new markets and delivers the tools needed to launch new products and services. CT has MJSP grant programs with such stellar companies as ConAgra, Universal Hospital Services, Capital Safety, and Gausman & Moore Engineering.

Customized training is one of the surest ways to outpace the competition, which never stops and rarely slows down. DCTC understands the speed of business. We know companies are only as fast as their people are smart. Our CT training and CE programs are all about people and making them smarter. We provide not only relevant, revenue-generating knowledge, but also the know-how to best apply it. Keep us in mind the next time you need topflight training custom-designed for your business needs. We would be more than proud to partner with you. It’s what we do.

Ronald E. Thomas, Ph.D.
President of Dakota County Technical College
“The Foundations of Leadership training has been well-received and really made a difference in attitude and teamwork.”

—Kristi Kuhnau, Human Resources Generalist with ConAgra Foods
BUSINESS & MANAGEMENT

PARTNERSHIPS

• Partnered with Gopher Resources to provide Project Management in 4 hours course.

• Partnered with Dakota County Chamber of Commerce to deliver an ongoing workshop series that will be offered to the DCCC members throughout Dakota County.

• Partnered with City of Eden Prairie to provide Strength Based Leadership training for over 80 leaders including the City Administrator, Police and Fire Chiefs.
BUSINESS & MANAGEMENT

HIGHLIGHTS

• Developed a Foundation Course for dislocated workers interested in entrepreneurship. This course is offered twice a month at the Apple Valley campus. More than 60 individuals have participated in this program in 2012.

• Created and delivered foundation course for the Direct Selling Education Foundation.

• Offering an ongoing retirement management class every two months at the Apple Valley Campus.

• Supported Precision Inc grant by developing and delivering leadership training to the leads.

• Supported Cardinal Glass grant by delivering the Creative Problem Solving Course for Leaders.

• Created a Leadership in “4 hour or less series of courses” to include in Business and Management materials.
“My experience at DCTC was awesome. Being able to learn in an open environment and having an instructor who took the time to give all students one-on-one attention was the best training I could have received. My goal was to work at the VA Medical Center as a phlebotomist. Well guess what, I was hired and I’m doing something I never thought I could do.”

—Larry Lambert, 2011 phlebotomy student
• Business & Management department faculty conducted a Multicultural Train the Trainer program for Precision Incorporated; twenty-four multicultural trainers attended a custom-designed curriculum that took into consideration the changing demographics in business.

• Money Magazine named city of Eden Prairie the number one small city in America. For the second year in a row, DCTC Business & Management faculty conducted Leadership Challenge© training for their Leadership Academy; twenty-four future leaders attended in a highly interactive learning environment that included panel discussions with the city leadership team.

• DCTC has worked with the Minnesota State Patrol for almost two decades to ensure that all vehicles passing through the state do not pose safety hazards; state decal serves as proof of inspection in all other states, enabling inspected vehicles to be driven nationwide; last year, DCTC trained almost 900 individuals, offering 30 certification and recertification courses with gross sales of $100,440 for the MnDOT Commercial Vehicle Instruction Program.

HEALTH CARE

PARTNERSHIPS

• Clinical partners provide mentorship and guidance as they share their on-the-job experiences with DCTC students placed at their facilities for a phlebotomy rotation. We have worked with Park Nicollet, Fairview Health Systems, Northfield Hospital and Apple Valley Medical Center. New partnerships this year include Regina Medical Center and the Mayo Clinic who supported our Law Enforcement phlebotomy experiences.

• An internal partnership with Debra MacDonald, Associate Dean of Nursing and Allied Health is creating ideas for new programs and opportunities for adjunct faculty to provide customized training for local healthcare providers.
• Limited Scope X-Ray Operator course enrollment increased from 24 to 47 (95 percent)

• Pharmacy Technician program enrollment increased from 27 to 80 (196 percent)

• Phlebotomy Technician program enrollment increased from 23 to 49 (113 percent)

• Gene Frank, our Limited Scope X-Ray Operator instructor is at the forefront of his field and keeps in touch with changing requirements for certification and licensing of those who take x-rays. We were able to help out 22 students from Wisconsin clinics before new licensing laws went into effect March 1st, 2012.
“The IT training provided by DCTC’s IT Training Center has helped our IT staff meet the demands and challenges of our rapidly growing and changing IT infrastructure. The training has contributed to the success for our business and IT employees.”

—Brian K., Motors Management Corp.
Highlights

IT/COMPUTER TECHNOLOGY

PARTNERSHIPS

• Partnered with Minnesota Zoo to deliver a series of Outlook classes for over 75 zoo employees.

• Our Sunset Learning Institute partnership continues to grow. We have successfully delivered 34 weeks of high-end Cisco training for clients across the Twin Cities region.

• Partnership with Knowledge Peak, our onsite partner at Eagan IT Training Center, is expanding operations to St. Louis, Mo. DCTC will be able to extend our market to this area by providing HD-live delivery courses.
HIGHLIGHTS

• Formed a partnership with Frontier Communications to provide licensure training for 150 technicians to meet the Power Limited License renewal requirements. This will be an annual training program scheduled for March and April each year at company sites across the state.

• DCTC Eagan is a designated IT certification testing center for three providers: Pearson VUE, Prometric and Kryterion/Webassessor

• Broadened scope of IT certification deliverables and newly selected curriculum along with strong providers and partners have enhanced DCTC Eagan course offerings
“DCTC, the instructors and the SOP developers were great to work with. This grant was a very positive experience and our facility has benefitted greatly from every dollar that was spent.”

—Doug Meyer, Human Resources Manager with Northern Star Co.
MANUFACTURING

PARTNERSHIPS

- Partnered with Dakota Electric to develop a customized training program for meter readers, to be delivered bi-annually.

- Collaborating with Uponor to develop hydronics courses for installers. Courses will cover radiant heat installation, radiant cooling, plumbing and fire safety, radiant system controls, and fire suppression systems.

- Offered hand-soldering skills training and IPC certification to Minnesota Resource Center clients in Minneapolis.

- Provided Print Reading, Shop Math, Precision Measurement and Welding Assessment to Toro employees in Shakopee.

- Conducted skills assessments and electrical training for Pace Dairy in Rochester.

- Trained and certified Mid-America Aviation employees in Fargo, ND.

- Provided IPC certification for Rosemount Nuclear in Chanhassen.
MANUFACTURING

HIGHLIGHTS

- Developed an advanced PLC course for open enrollment, to be implemented FY 13. Refocused the systems troubleshooting course on electrical troubleshooting; delivered spring 2012.

- Delivered Fire Safety Engineering training to Uponor North America employees through a new 288-hour, nine college credit certificate program.

- Hosted Union Pacific Railroad internal training programs.
“The St. Paul Police Department is glad to have DCTC as a training partner. We have found the staff to be professional and knowledgeable. The facility is easy to use and maintained very well. Our training needs have always been fulfilled to the best of anyone’s ability. I sincerely hope that our working relationship grows over the course of time.”

—Terry Erdman, Unit Sergeant, St. Paul Police Department Training

PUBLIC SAFETY

PARTNERsHIPS

• Working with MN State Patrol and our nursing staff, we currently have the only law enforcement phlebotomy program in the state.

• Working with Minneapolis Fire Dept to provide on-site driver training.

• Ongoing partnership with the Minnesota Motorcycle Safety Center to offer beginner and advanced motorcycle training. DCTC trains 400-600 students a summer.

PUBLIC SAFETY

HIGHLIGHTS

• DCTC continues to provide quality training and testing facilities to many organizations, including Polaris Industries, MICO, Land Rover/Jaguar/Lotus, Northstar BMW, Corvettes of America, Silver Cycling and many others.

• Our program provides emergency response driving training to fire departments and ambulance services.

• DCTC continues to provide quality training to law enforcement agencies. We have been adding new departments each year.

DCTC continues to provide quality training and testing facilities to many organizations, including Polaris Industries, MICO, Land Rover/Jaguar/Lotus, Northstar BMW, Corvettes of America, Silver Cycling and many others.

Our program provides emergency response driving training to fire departments and ambulance services.

DCTC continues to provide quality training to law enforcement agencies. We have been adding new departments each year.
“Since October of 2007, the Hydraulic Launch Assist (HLA) Engineering team of Eaton Corporation has partnered with DCTC, providing Eaton with effective and continuous testing of multiple refuse trucks equipped with the HLA System. Throughout this development, the DCTC organization provided invaluable support, interest, enthusiasm and flexibility in supporting our challenging effort to release this product. Eaton continues to focus on green technology with an emphasis on our hybrid programs. We have already begun development on next generation hybrid systems that will continue our need for DCTC support for the next several years.”

—Vincent Duray, Chief Engineer–Hydraulic Hybrids, Vehicle Group–Hybrid Power Systems Division, Eaton Corporation
TRANSPORTATION

PARTNERSHIPS

- Continued long term relationship with Eaton Corporation providing testing on hybrid vehicles with efficiencies and green technology as primary objectives

- Maintained and provided a variety of training disciplines for the Metropolitan Council including Heavy Equipment Operation training as well as CDL training.

- Continued relationship with the Minnesota Teamsters Construction Division providing successful CDL training for diversity based participants.

- Maintained long term relationships for a variety of training needs with “Workforce Center” and “Hired”
TRANSPORTATION

HIGHLIGHTS

- Provided Defensive Driving Training using the DCTC driving track to a wide variety of participants from many city, county and municipal groups in various vehicles including snow plows, school busses and specialty equipment.

- Provided CDL training to private individuals as well as corporate groups.

- Provided forklift training on a regular and as need basis to individuals and groups.

- Provided track rental to high visibility customers including but not limited to Porsche automobiles and Ducati motorcycles.
“Customized Training bridges the gap between employees and the skills they need to meet today’s job challenges, whether training in the classroom or at industry sites.”

—Patrick McQuillan, Dean of Customized Training at Dakota County Technical College
CONAGRA FOODS, INC.
A partnership with Dakota County Technical College (DCTC) and three ConAgra Foods facilities located in Maple Grove, Hastings and Lakeville will focus on increasing the skill levels of ConAgra maintenance mechanics and provide a new career path through an apprenticeship program for machine operators. Over the two-year grant period, a total of 575 employees will receive training that includes Mathematics for Mechanics/Electricians, DC and AC Electrical Theory, Mechanical Drives and Industrial Controls. Trainees will earn college credits and certifications for successful completion of the training. The implementation of “Playbooks” (pictorial PowerPoint presentations that visually communicate production floor tasks) will improve production quality. This project will allow DCTC to customize several existing courses for the food industry and support the school’s plan to develop a new Industrial Maintenance Program.

ANDERSEN CORPORATION
Andersen Corporation, headquartered in Bayport, manufactures wood windows and doors, with sales worldwide. Through MJSP funding, Dakota County Technical College will partner with Andersen experts to design a set of courses that will update the mechanical, troubleshooting and repair skills of 120 Andersen maintenance associates. CEUs will be awarded for completion of training. This partnership will help the employees to meet the new challenges of automation required in a modern manufacturing facility.

CAPITAL SAFETY GROUP
MJSP • $300,000 • Nov. 2009 – Oct. 2012
This project will assist the largest fall protection company in the world, Capital Safety Group, in Red Wing. The company is in the process of developing new product lines to market to the growing wind energy field. Through MJSP funding, Dakota County Technical College will provide training and professional development for the workforce of Capital Safety Group, focusing on front-line and shop floor workers. Courses such as Wind Energy Safety/OSHA, Mechatronics, and advanced computer training will build the skills of 354 employees. In addition, they will build a career pathway for shop floor employees by developing supervisory skills. Green manufacturing techniques will be incorporated to help the company remain competitive within the rapidly growing global industry. This project will result in the much needed skills and a prepared workforce to expand Capital Safety’s work and product lines, resulting in job creation in the emerging wind energy field, with increased safety for workers within that industry. Dakota County Technical College will improve their capacity through the customization of existing courses and the development of new courses. Contributions of specialized protection equipment will enhance student training at the college.

MICHAEL FOODS, INC. NORTHERN STAR CO.
Northern Star Company is a leading producer of refrigerated potato products and a wholly owned subsidiary of Michael Foods, Inc. Their recent relocation to a larger facility, along with their investments in new equipment has created a need for employee training. A partnership with Dakota County Technical College will provide customized training to increase the skills of 257 employees that will allow them to fully utilize the new facilities and equipment, institute total preventative maintenance and bring about a change in culture with a focus on increased operator responsibility. The development of new Standard Operating Procedures will include a series of pictorial based PowerPoint presentations that visually communicate job tasks. Labor coaches will work with line leads to ensure knowledge is transferred to other employees. This project will result in improved production and maintenance systems at Northern Star with employees gaining significant new skills in food manufacturing and equipment maintenance. Dakota County Technical College will enhance their capacity through the customization of curriculum and the development of a Food Operators course.

CARDINAL SOLAR TECHNOLOGIES
MJSP • $49,687 • Feb. 2012
Cardinal Solar Technologies is an industry leader in the development of residential glass for windows and doors. It’s Northfield solar technologies plant is a 270,000 sq. ft. facility that employs 90 people. After a decline in the residential glass market, Cardinal’s glass coating facility began running at 50 percent capacity. Rather than shutting down operations to align supply with demand, Cardinal decided to manufacture products for the photovoltaic industry. This new venture will require an extensive investment in equipment and personnel, and the grant will allow employees to be trained in the latest technologies and industrial practices, including maintaining and programming robotic equipment (Mechatronics), Six Sigma, statistical process control and handling hazardous materials.
UNIVERSAL HOSPITAL SERVICES
Universal Hospital Services (UHS) is a leading medical equipment lifecycle service company with over 300 employees based at four Minnesota locations (Edina, Minneapolis, Duluth and Rochester). A partnership with Dakota County Technical College (DCTC) will help the company continue to meet its customer needs by developing more cost effective goods and services. DCTC will work with outside experts in mobile media to establish a new certificate program in the latest technology in delivering apps to the mobile market within UHS. Three hundred employees will receive training through new and customized courses that include Green Process Controls, Patient Handling Processes, Advanced Customer Service, Wireless and Media, Apps Production and Competency Verification Systems. Most training will be held on-site at UHS or at the client’s healthcare facilities utilizing both computer-based or classroom delivered training. Training will expand UHS’s work in the biomedical equipment, repair, refurbishment and sales/rental fields resulting in job creation in that industry. DCTC will increase its capacity with the development of new curriculum and update existing curriculum in the Biomedical Technician Repair Program.

VIKING GAS TRANSMISSION COMPANY
MJSP • $49,783 • Mar. 2011 – Feb. 2013
MJSP funds will support a partnership with Dakota County Technical College (DCTC) to provide needed training to the workforce of one of the largest Energy facilities for gas transmission in the United States. The pipeline system, in operation since 1960, moves 550 million cubic feet of natural gas from the Canadian border through central Minnesota and into Wisconsin. Headquartered in Eagan, Viking Gas has 60 employees working at six compressor stations located in cities that include Milaca, Detroit Lakes, and North Branch. Hands-on training will be delivered to all employees at company headquarters and at the college campus. Courses will be customized to meet the requirements of the industry as well as mandates of the Department of Transportation and the Department of Energy. They include: Industrial Electronics, Automation Controls, Valve Mechanics, and Process Controls and Measurement. The college will provide certifications. As a result of this project, Viking Gas will have a more knowledgeable and skilled workforce and DCTC will be prepared to train other local pipeline employees or those industries needing similar training.

PRECISION, INC.
Minneapolis-based Precision, Inc. employs 89 individuals who design, manufacture and market magnetic components used in applications serving Medical, Telecommunications, Electronic Instrumentation, Industrial Controls, Consumer Electronics and Avionics/Aerospace/Defense markets. A partnership with Dakota County Technical College will provide customized training to 58 employees over a 20-month period. Courses include: Soldering Skills, IPC Certification, Machine Programming and Supervisory Skills. A Train-the-Trainer course will provide 12 employees with the skills to administer IPC Solder certification/recertification internally. This project will result in higher levels of competency and performance as well as advancement opportunities for employees of Precision. With the utilization of state-of-the-art equipment, provided by Precision, Dakota County Technical College will gain valuable experience that can be transferred to other manufacturers and biomedical equipment providers.

BAYER BUILD WOODWORKS, INC.
MJSP • $250,00 • Mar. 2011 – Feb. 2013
Bayer Built Woodworks is a major employer in Belgrade with 265 employees who manufacture and finish millwork. MJSP funding will support a partnership between Dakota County Technical College and Bayer Built that will provide training to 222 employees over a two-year period. DCTC will work with Kyoger (a company that develops and distributes virtual reality-based processes and visualization solutions) and the American Wood Finishing Institute (a leader in coating systems operating procedures) to develop a virtual reality coatings program customized for Bayer Built. Employee training will result in improved efficiencies in product application, color consistencies and processes that will allow Bayer Built to retain their current workforce and grow/expand their labor force. DCTC will increase its capacity in wood finishing and coating processes and an acquired Virtual Reality Coating System will be valuable in training other students and industry partners.

GAUSMAN & MOORE ASSOCIATES, INC.
MJSP • $175,241 • June 2011 – Oct. 2013
Gausman & Moore Associates is a 75-year old firm providing mechanical, electrical plumbing and data engineering consulting services. They employ 90 individuals at two Minnesota offices located in Roseville and Duluth. Through a partnership with Dakota County Technical College (DCTC), 90 employees will receive training that focuses on updated software and technology, incorporating green energy and evolving technologies, ensuring safety and upholding emerging codes, and improving business systems and project management. New and customized courses include: Autodesk/Revit, Bentley Building Systems, Solar/Thermal Training, Total Quality Management, LEED and Job Coaching.
creating new ones. It will also allow DCTC to expand

Dakota County Technical College (DCTC) will provide

company located in Coon Rapids. A partnership with

Baldinger to remain competitive in the marketplace. DCTC
will gain capacity through its customization of training
that directly reflects the advanced equipment used by the
industry.

MJSP funds will support a partnership between Dakota
County Technical College (DCTC) and Baldinger Bakery
as they transition to a new manufacturing facility located
on St. Paul’s East Side. On-site training will upgrade the
skills of 60 employees with courses such as Industrial
Electronics, Automation Controls, Robotics/Packaging
and Supervision/Management Skills. The combination
of the latest technology and a skilled workforce will help
Baldinger to remain competitive in the marketplace. DCTC
will gain capacity through its customization of training
that directly reflects the advanced equipment used by the
industry.

ECM PUBLISHERS, INC.
ECM Publishers is a publishing, printing and distribution
company located in Coon Rapids. A partnership with
Dakota County Technical College (DCTC) will provide
customized training to 39 sales and advertising staff and
give them the skills to compete with new-media technology
(such as Internet and wireless communications). Classes
will include: Introduction to Digital Advertising, and
Creative Sales Techniques/Newspaper Professionals. This
project will help ECM Publishers keep pace with new-
media technology, thereby, preserving jobs and ideally
creating new ones. It will also allow DCTC to expand
its electronic-communication capacity, which will be
applicable to the needs of other businesses in the industry.

LORAM MAINTENANCE OF WAY
MJSP • $150,000 • June 2011 – Oct. 2013
Loram Maintenance of Way, located in Hamel, specializes
as a manufacturer of state-of-the-art equipment and a
service contractor for railway track maintenance. Over
a two-year period, Dakota County Technical College
will work with Loram to customize courses focusing on
electrical, mechanical/welding, hydraulics and painting.
A total of 93 employees will upgrade their skills through
courses such as AC/DC Electricity, Controls/PLCs, Lifting
and Rigging, Fasteners, and Hydraulics Systems. Training
will increase opportunities for employees to move up the
career ladder and help the company increase efficiency,
profitability and competitiveness. DCTC will update
existing curriculum as they build a relationship with
Loram that will increase its capacity to work with similar
companies.

FINDLAW
FindLaw, a Thomson Reuters business, is the world’s
leading provider of online legal information and Internet
marketing solutions for law firms. As the largest search
marketing team in Minnesota, this Eagan business
employs 650 individuals who must keep pace with the
rapidly evolving technology and marketing practices in
“search.” In partnership with Dakota County Technical
College (DCTC), 449 employees will be selected for training
that will include SEO (Search Engine Optimization)
Basics, SEO and Content 101, SEO and Usability and SEO
& Development. SEO, the practice of optimizing web
content to achieve a higher ranking in search results, and
therefore a greater visibility, is an emerging technology
area which is continuously changing as the dependence on
the internet for business grows. Employees demonstrating
competency and performance as a result of this training
will be eligible for promotional opportunities. Training will
help to ensure the continued success of FindLaw. Longer
term, this material will provide the platform on which to
create a SEO/SEM training program to develop a deeper
pool of talent in Minnesota.

ST. JUDE MEDICAL
MJSP • $49,942 • Feb. 2012 – Feb. 2013
St. Jude Medical, located in Minnetonka, develops medical
technology and services that focus on putting more control
into the hands of those who treat cardia, neurological and
chronic pain patients worldwide. Headquartered in St.
Paul, they focus on four major areas that include cardiac
rhythm management, atrial fibrillation, cardiovascular
and neuro modulation. With 2,960 Minnesota employees,
St. Jude offers a product line that includes pacemakers,
electrophysiology catheters and spinal cord stimulation
devices. With a high percentage of foreign-born
employees, the company is challenged by language
barriers. In a partnership supported by MJSP, St. Jude
Medical will work with Century College to utilize video
technology that will make the manufacturing processes
understandable to those employees with limited English
skills. Century College will film, narrate and incorporate
animation/graphics focusing on production processes that
include Programming Reflow, Mandrel to Braid Assembly
Second Jacket Reflow and Operate Reflow Oven. A total
of 39 employees will be selected to participate in training
that will increase their comprehension of English, build
skills and confidence and create standardized on-the-job
training that will lead to consistency and effectiveness
among trainers and trainees.
GERDAU (LONG STEEL NORTH AMERICA)  
As one of the largest producers of steel in the country, Gerdau employs 390 individuals at facilities in St. Paul and Duluth. Through MJSP funding, Gerdau will partner with Dakota County Technical College (DCTC) to expand the skill sets required for newly acquired equipment and changing production technologies. Over a two-year period, DCTC will customize and deliver curriculum to meet the needs of the entire workforce. Courses include Foundational Electrical, Math and Computer Skills; Motor Controls; Programmable Logic Controllers; Mechanical Systems and Hydraulics; and New Equipment Operation training as well as training on new technology, safety and continuous quality improvements. Some courses will earn college credits. This project will help Gerdau to maintain a competitive edge and retain jobs at risk as well as strengthen DCTC’s ability to respond to the needs of the manufacturing industry in Minnesota.

SWEET HARVEST FOODS  
MJSP • $49,266 • June 2012 – Oct. 2013
Since 1923, Sweet Harvest Foods has grown and expanded its product line to include honey, syrups, salad dressings and specialty peanut butter. Located in Cannon Falls, with 41 current employees, the company plans to add 15-30 new positions over the next two years. The addition of new employees along with new equipment has created the need for training to prepare a flexible, technically adept workforce for the future. MJSP funding will support a partnership with Dakota County Technical College to develop training for 56 employees (41 current and 15 new). Managers and supervisors will complete a Train-the-Trainer to develop materials and strategies for continued training and all employees will be introduced to the concept of Lean Manufacturing to help eliminate waste and promote company growth.

SEBESTA BLOMBERG  
MJSP • $49,594 • June 2012 – Oct. 2013
Established in 1994, Sebesta Blomberg is a nationally recognized provider of full-service engineering and design services. Located in Roseville, the company currently employs 195 employees. As more emphasis is placed on green buildings and renewable energy in both new construction and retrofitting existing buildings, Sebesta is adapting to fill this growing need in the engineering field. Dakota County Technical College will develop and deliver customized training to 70 engineering and support staff. Courses include: Solar/Thermal Energy, Solar Strategies, Energy Modeling, Process Improvement, and Customer Relations Strategies. Training will upgrade the employee skill sets and raise technical and service proficiency. In addition, Dakota County Technical College will be able to take the training concepts to other engineering firms in Minnesota and integrate curriculum into existing credit and customized training.
