MAJOR DESCRIPTION

This award-winning Interior Design program is a challenging course of study preparing students to launch a career in an exciting and dynamic profession. Emphasis is placed on acquiring the hands-on knowledge and skills to design functional and aesthetically engaging environments. The curriculum is architecturally based and explores spatial design and its' embellishment. All aspects of space—scale, proportion, configuration, and lighting, as well as textures, materials, and color—are studied in relation to their effect on human well-being. Technical skills are gained in the latest computer-aided design (CAD), building information management (BIM) software, and 3D visualization and graphics. Current software includes: Auto-Cad, Revit, Sketch-up, 20/20, Photoshop and InDesign. These skills allow students to produce professional presentations and construction documents.

The students work closely in small groups with their instructors/industry practitioners on projects that develop in size and complexity. Service-learning and inter-disciplinary projects provide a real world experience. Graduates leave the program with a solid technical foundation and have the skills to collaborate with fellow professionals and deliver sustainable interior environments matched to the needs of their clients. Students also have options to transfer Interior Design credits to a 4-year university.

ACCREDITATION

The Interior Design program is accredited by the National Kitchen and Bath Association.

WORK ENVIRONMENT

Interior designers work closely with clients, home owners, businesses, architects, contractors, and tradespeople. They frequently work as members of a design team, primarily in architecture and interior design firms. This can be a highly competitive field, where use of the design process is critical to meeting project deadlines. Graduates will find employment in many areas, such as: residential design/architectural firms, kitchen and bath studios, furnishings, product sales, builders, and showrooms.
